

## Sean Macleod

I've been a Lewes FC fan now for 12 years when I moved here to be with my wife, I volunteered at the club for many years though due to a nervous breakdown 6 years ago I had to take a step away from all things football but thankfully all that is behind me now. I have worked with previous directors at club and helped create Football Therapy which I ran for about 4 years starting from about 4 people in Shakespeare hall in Newhaven to having over 20 players registered, we hosted the Football therapy cup bringing teams from across the country to Lewes and we was even invited to Dundee United to talk about our project with the club.

I am passionate about the community. I have been a Lewes District councilor for 5 years now and have a good understanding of how working as a team even with people you might not agree with all time is integral to the way things run smoothly. I want to see Lewes grow more as a community expanding its disabled vision at the club and looking at deaf, blind and other disabilities so making the club truly inclusive, football is an amazing healer and can help so many people.

While I didn't agree with the Take over of the women's side I passionately believe in democracy and the club voted for the take over and it's important that directors of the future listen to the fans and work together to deliver the best future for Lewes FC.

I hope that fans will give me the opportunity to be a voice for them, this club saved my life and I feel the club is potentially at a bit of a crisis point and I would like to help put it back on the right footing and make sure it has a long and sustainable future.
